

# NUTRILITE™ & NSF® INTERNATIONAL CERTIFIED QUALITY & SAFETY

**Nutriline™ products have always been the highest level of quality – from seed to supplement.**

Now, we've invested in a new third-party independent certification from NSF® International, one of the most respected independent certification organizations in existence today. This new certification greatly expands the Nutrilite® supplement portfolio of certified products in North America.

**Nutriline™ and NSF® mean credibility.**

When customers see the NSF® seal on Nutrilite® supplements, they can be assured these products are credible, contain the ingredients on their labels, are safe, and meet the highest standards possible.

**NSF® certification is not an easy or inexpensive process.**

This shows Nutrilite™ products are exceptional. NSF® certifies the Nutrilite™ brand's manufacturing facilities, and each individual product, to ensure the contents in every certified supplement match the printed label, and at the level specified. NSF® also certifies that these Nutrilite™ supplements are safe and free of harmful contaminants.
